NASA SEWP VI Ordering Guide

About 16 Cyber

16 Cyber LLC is a WOSB JV between StorageHawk (Partner Venturer) and Inode Ink Corporation (Managing Venturer). We provide engineering, cybersecurity, IA, network design/modernization, and operations support services worldwide.

About StorageHawk

Founded in 2004, StorageHawk specializes in technology sales and consulting to all verticals of the Federal Government, including the Department of Defense, the intelligence community, and civilian agencies.

If you need to categorize us, StorageHawk is most like a “value-added reseller.” But hardware and software from tier-one partners is just one component of the solutions we provide. The other equally essential part is our proven expertise in using products to solve technical issues inside agency data centers. For us, technologies are tools. We choose the tools according to the task—and the results they produce.

So call us what you will. Our customers call us to help them meet their challenges and fix their issues—fast.

About Inode Ink Corporation

Inode Ink Corporation (INODE) is an innovative Woman-Owned Small Business (WOSB) that provides IT Technical and Professional Services in infrastructure, systems engineering, data science, and emerging technologies for Federal agencies and commercial partners. We have strong multi-decade relationships with industry-leading OEM’s and are a certified Partner of Nutanix, VMware, NetApp & UiPath.

Our customers view us as a trusted partner, and we take that trust very seriously. We have engineered, deployed, and continue to support solutions at the cutting edge of technology that support major federal agencies and institutions. We provide the experts needed to understand, secure, and support our customers critical missions. We transform their technical base through the application of emerging technologies to advance their capabilities and make tomorrow safer and smarter. We are committed to being there for our customers, whether that be through remote support or putting boots on the ground around the world, even where the risks are high. Whatever the challenge, we are here to help you overcome it.

About NASA SEWP VI

The NASA Solutions for Enterprise-Wide Procurement (SEWP), pronounced “soup,” provides the latest Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services for all Federal Agencies and their approved contractors. Created in 1993, SEWP I was the first Government-Wide Acquisition Contract (GWAC) in the federal acquisition space. Originally, the contract vehicle provided only technology products for NASA and all other agencies. SEWP has continually evolved over the past 30 years, expanding its scope to meet the requests of its customers.

NASA SEWP VI is a multi-award GWAC providing the next generation of IT acquisition for U.S. Federal Agencies. It has expanded beyond traditional product procurement to include full-scope technology services, integration support, and enterprise-wide modernization services. SEWP VI has a 10-year ordering period (Nov 1, 2026, through Oct 31, 2036), supports multiple contract types including hybrids, and has a low administrative fee of 0.34%.

SEWP VI Fee

The SEWP surcharge for all orders is 0.34%. The fee is included in the price of all products and is not separately listed on quotes.

Fair Opportunity Clause

The NASA Solutions for Enterprise-Wide Procurement (SEWP) VI contract is a multi-award government-wide acquisition contract (GWAC) and includes the following clause:

A.1.21. FAIR OPPORTUNITY AND REQUESTS FOR QUOTES

Contractors will be provided fair opportunity at the individual order level as appropriate per FAR Part 16.505(b), including the SEWP RFQ tools. No documentation for the order selection is required to be submitted with the order. All such documentation is to be maintained by the issuing procurement office.

The Contractor shall not market, quote or otherwise offer for sale, under the contract, any products not listed in Attachment F, Pricing Exhibits as defined in the SEWP database of record until the said products are included in the SEWP database, and available to all Government end-users.
If the Government issues a Request for Information (RFI) as part of market research, the Contractor may provide items not yet listed on their SEWP contract as part of a market research quote if:

1. all such items are clearly marked as not yet available on their SEWP contract;
2. the contractor submits a technology refreshment request to add those products to their contract

If the Government issues a Request for Quote (RFQ) or a Market Research Request (MRR), the Contractor may only respond with items available on their Contract. If the Contractor has insufficient items on their contract to fully respond to the Formal RFQ, the Contractor must

© 2026 · 16 Cyber · All rights reserved.

respond with a No Bid. Unless the RFQ specifically allows for partial quotes, the Contractor must respond fully to all requirements specified in the RFQ.

When the Contractor markets, quotes or otherwise offers for sale a product under this contract, the price of each item shall be the no greater than the price in Attachment F, Pricing Exhibits as defined in the SEWP database of record at the time the quote is issued.
When submitting a quote to a Government end-user, the contractor must clearly state the length of time the quote is valid. The contractor shall honor any order submitted within the stated time period of a quote.

When responding to an RFQ or MRR issued from the NASA SEWP on-line quoting system, the Contractor must respond as outlined in Attachment D, Section D.1. On-line Quoting.

As a result of the Small Business jobs act, the issuing Contracting Officer can set aside an order for small businesses as long as there are two or more with that designation.

What is In Scope?

SEWP is designed to provide a broad suite of Information Technology, Communication and Audio Visual (ITC/AV) solutions and services. Technology is ever evolving and for that reason SEWP's processes enable Contract Holders to add new commercial technology and IT services to their contract daily, as requested by our customers. The focus of SEWP is on the full suite of technology offerings that simplify Governmental access and Industry offerings across the entire ITC/AV solutions and services landscape. SEWP is composed of three (3) scope categories detailed below. If you would like SEWP to determine if your requirement is within scope of the SEWP VI contract, please send an overview and/or bill of materials (BOM) to help@sewp.nasa.gov and we will quickly review and provide feedback.

The SEWP Contracts were awarded by scope category; the three categories are:

Category	Scope
Category A	ITC/AV Solutions
Category B	Enterprise-Wide ITC/AV Service Solutions
Category C	Mission-Based ITC/AV Service Solutions

Obtaining a Quote

The recommended method for obtaining a quote is through the SEWP Quote Request Tool (QRT), available on the NASA SEWP website. Customers must create a SEWP account to access the tool. SEWP also provides comprehensive training to help users understand how to navigate and use the QRT.

The internal ordering process varies by agency. The procedures and required documentation for Purchase Requests (PRs) and Delivery Orders (DOs) issued under a SEWP contract are established by the ordering agency, not the NASA SEWP Program Management Office (PMO).

© 2026 · 16 Cyber · All rights reserved.

Typically, the process begins when an end user identifies a requirement and submits a Purchase Request (PR). The PR, along with the necessary funding documentation, is forwarded to the agency's procurement office for processing and issuance of a Delivery Order (DO).

Agencies may use any valid Federal Agency DO form and the associated delivery order number. The NASA SEWP PMO does not issue Delivery Orders; they must be issued by the ordering agency's procurement office. The SEWP PMO's role is to review, process, and track issued DOs before forwarding them to the applicable SEWP Contract Holder(s).

Some agencies may have additional requirements or internal procedures for issuing IT Delivery Orders. It is the responsibility of the issuing agency's Contracting Officer (CO/KO) to ensure compliance with all agency-specific policies governing the use of existing contract vehicles, including GWACs.

SEWP contracts do not require ordering agencies to use an intermediary procurement office to issue Delivery Orders. However, agencies must follow their own internal procurement policies and procedures, which may impose additional requirements.

Regardless of Agency-specific Ordering processes, the general flow for SEWP orders is:

A. End User or Contracting Officer
   1. Determines best value through market research.
   2. Create Delivery Order – Cite NASA SEWP Contract # and Prime Contract Holder.
   3. Sends Order to NASA SEWP PMO at sewporders@sewp.nasa.gov

B. NASA SEWP Program Management Office (PMO)
   1. Verifies Order.
   2. Forwards valid Order to the appropriate Contract Holder.

C. SEWP Contract Holder
   1. Processes Order.
   2. Delivers Equipment & Services.
   3. Invoices Agency or Contractor.

If modifications are made to any order, these modifications must also route through the SEWP PMO.

To assist you in preparing your delivery orders, below you will find important information in reference to processing delivery orders through the SEWP Program office. Please feel free to contact the SEWP helpline if you have any questions concerning your purchase orders, our webtools or any SEWP related topics at 301-286-1478. Our hours of operation are as follow Monday – Friday 7:30 am to 6:00 pm EST.

Delivery orders are required to contain the following information for processing. If the below information does not appear on the delivery order, the order may not be processed or processing may be delayed.

- Delivery Order Number (any valid Government DO is allowed)
- Quote from a SEWP Contract Holder verifying the viability of the order
- SEWP Fair Opportunity Form for orders over $5 Million
- Date Delivery Order Issued
- SEWP Contract Number
- SEWP Contract Holder’s mailing address and phone number
- Issuing Office: Agency Name and Mailing Address
- Ship to Office: Agency Name and Mailing Address

© 2026 · 16 Cyber · All rights reserved.

- Total dollar amount of order
- Contracting Officer's Signature
- Contracting Officer's Phone Number
- Date Delivery Order Signed
- Line Items/Pricing

For technical assistance from 16 Cyber after an order has been placed, please contact us.
